Personal project

For more information about my project, please visit my personal **website**

Develop R package to retrieve Vietnam stock data
This package make an request and retrieve stock data from vndirect and cafef.vn
- https://github.com/vohai611/vnstockr
- https://www.vohai.xyz/project/2021-08-06-retrieve-vnstock/

Scraping Vietnam highschool graduate exam
I use R to scrape all Vietnamese highschool graduate exam score data in the year 2021
- https://github.com/vohai611/diemthi-thpt-2021

Visualizing & analyzing Vietnam statistic data
I use the data provided by Vietnamese statistic department to write an report and build an dashboard on three
fields: education, economic and cencus data
- https://www.vohai.xyz/project/2021-08-06-vietnam-statistic-dashboard-with-r/

Shift schedule optimization web app
I developed an web app to schedule working shifts which enables users to customize their options, e.g., how
many shifts per day, wheather a staff could work 2 shifts continuously
- https://haivo.shinyapps.io/schedule-optimizer/
